CDM Meth Panel work plan for 2011

EB 60

Bangkok, Thailand, 11-15 April 2011

BACKGROUND

- The work plan for the Methodology Panel 2011 was developed based on the CDM Management Plan 2011 approved by the Board
- The work plan includes the regular activities to be performed by the panel as well as new activities related to the objectives of the CDM Management Plan 2011
- The document provides details of the activities, expected outputs and timelines, each being associated with related CDM Management Plan 2011 objective

KEY ELEMENTS

The MP work plan includes the following key elements, in addition to the regular activities performed according to its mandates:

1. Top-down development of new methodologies and tools

- Identification of methodologies and tools applicable in regions and project types that are under-represented in the CDM
- Development of methodologies and tools
- Participation in relevant practitioner workshops on CDM methodologies

2. Development of standardized baselines

- Development of standardized baselines that are applicable in regions and project types that are under-represented in the CDM
- Provide support to the Board on methodological issues related to standardized baselines

3. Development of a framework document on baseline determination

- Consideration of the issues related to baseline determination in CDM methodologies
- Development of a framework or background document on baseline determination

4. Improvement of existing methodologies and tools

- Assessment of methodologies and tools for potential improvement based on potential for simplification, strengthen the assurance of environmental integrity, and the enhancement of their objectivity, usability, applicability and consistency
- Revision of methodologies and tools
- Participation in relevant practitioner workshops on CDM methodologies

5. Support in developing the tables of calculation for methodologies

- Review of the draft tables developed by the secretariat
