

## Agenda item 6

Paragraph 70 of the annotated agenda

# PROVISION OF THE STATUS OF ALL SUBMISSIONS ONLINE

**CDM EB 65**

Durban, South Africa, 21-25 November, 2011

## SUMMARY

- Background
- New view of a list of requests
- New view of a details page of a request

# Background

---

- **Decision 3 taken at CMP 6** (reflected in the **CDM MAP 2011 Objective 4-b**) requested the Secretariat to increase the transparency of its work by, inter alia, publishing online the **current and historic statuses** *“regarding the processing of case-specific matters and methodologies, including requests for clarification, deviation and revision and for changes to project design documents”*.
- Based on a state of play regarding the status information available on the CDM website, and assuming that the on-going work to improve procedures will publish the status information for processes involved, the focus has been put on the following requests:
  - a) **Proposed new methodologies**
  - b) **Clarification and revision of methodologies and tools**
  - c) **Deviation from the monitoring plan and from an approved methodology**
- Changes have been done for both **pending** and **finalized cases** which are now **segregated on the CDM website** for clarity purposes.

# New view of a list of requests

For each type of request considered, we display a list of [pending requests](#) (example below) and a list of [finalized requests](#) provided with a search facility.

## Pending proposed new SSC methodologies

There are 11 pending proposed new methodologies in this category
